IBExpert Firebird Database Servers

We have developed our IFS servers specifically and exclusively for the operation of fast, secure and powerful Firebird databases.

Firebird database software has no performance issues provided the server is suitable!

Should you have had different experiences with your software and Firebird performance, it can only be due to the software itself or the server hardware you are using.

There are obvious advantages to running the Firebird database on a separate server, as other software, such as your service programmes, are not and should not be affected.

The self-contained system excludes unwanted access to the server system.

The database is remotely maintained by our IBExpert IFS team for prompt troubleshooting 24/7.

IFS Server Models

Basic

- Optimised and dedicated for Firebird databases
- 0.8 TB SSD for operating system
- 0,8 TB SSD NVMe SSD drive for Firebird 2.5/3.0/4.0 databases/backups
- Dual Network interface: 1 GBit RJ45
- 32 GB RAM
- Operating system preinstalled Windows 2019 Std or DC without license key or Ubuntu Linux
- 1.5 U height / 19 inch width, 40 cm length rack case
- Recommended up to 25 users

High End

- Optimised and dedicated for Firebird databases
- 0.8 TB SSD for operating system
- 3.2 TB NVMe SSD drive for Firebird 2.5/3.0/4.0 databases/backups
- Optional up to 30 TB SSD
- Dual Network interface: 10 GB RJ45 compatible 1 GB RJ45, optional 10 GB SFP+
- 64 GB RAM optional up to 128 GB
- Operating system preinstalled Windows 2019 Std or DC without license key or Ubuntu Linux
- 1.5 U height / 19 inch width, 40 cm length rack case

Advantages

Developed by Firebird database specialists
High reliability
Optimal performance
Maximum stability
Optimized Linux system installation
24/7 hardware maintenance (remote maintenance)
Backup/restore facility for database backups
Up-to-date benchmarks for all Firebird versions

Costs

IFS Rackserver Basic 2,890 Euros
Maintenance contract and RemoteDBA for
4 years: 999 Euros
3,889 Euros

IFS Rackserver High end from 4,890 Euros
Maintenance contract and RemoteDBA for
4 years 1,499 Euros
From 6,389 Euros
